

TEJORY

The World's Easiest Hardware Wallet

- ✓ UNRIVALED SECURITY
- ✓ INTUITIVE EASE OF USE
- ✓ SLIM & DISCREET DESIGN
- ✓ ALWAYS AUDITED, ALWAYS SECURE
- ✓ WEB3 WITH NO TOLLS

Supported Tokens

EAL6+ CERTIFIED

The heart of every Tejory Core wallet is a state-of-the-art EAL6+ certified Secure Element.

POST-QUANTUM CRYPTOGRAPHY

Tejory Core is built with support for Post-Quantum TLS (PQTLS), ensuring that the communication channels you use to manage your assets are fortified against the looming threat of quantum computing.

KEYS IN A VAULT

Your private keys are generated and permanently locked within the secure element. Transactions are signed on-card, never exposing your keys to the app

NO VENDOR LOCK-IN

We use the industry-standard BIP-39 recovery phrase, giving you the freedom to move your assets to another compatible wallet anytime.

LOWEST FEES OF LIGHTNING

Instantly send and receive Bitcoin over the Lightning Network. No complex setup, channel management, or node required—it just works

WEB3 WITH NO TOLLS

We connect you directly to the best DEX liquidity pools, bypassing middlemen to guarantee the lowest fees and optimal exchange rates

SLIM & DISCREET DESIGN

Fits perfectly in your wallet, offering discreet and convenient access to your digital assets wherever you go.
